☰ Week #	3

Accessibility

- Various forms of disability or impairment
 - Vision
 - Speech
 - Touch
 - Sensor-Motor
- Can a page be accessed by people with impairments?
- How can the accessibility of a page be improved?

[W3.org](#) - World Wide Web Consortium (W3C) - Accessibility guides

<https://www.w3.org/WAI/fundamentals/accessibility-principles>

Standards

Interplay between many components of a page:

- Web content: HTML, images, scripts, etc
- User-agents: Desktop browser, Mobile browser, speech-oriented browser, assistive devices
- Authoring tools: Text editor, Word processors, Compiler

Principle - Preceivable

- Provide text alternatives for non-text content
- Provide captions and other alternatives for multimedia

- Create content that can be presented in different ways, including by assistive technologies, without losing meaning.
- Make it easier for users to see and hear content

Principle - Operation

- Make all functionality available from a keyboard
- Give users enough time to read and use content
- Do not use content that causes seizures or physical reactions
- Help users navigate and find content
- Make it easier to use inputs other than keyboard

Principle - Understandable

- Make the text readable and understandable
- Make the content appear and operate in predictable ways
- Help users avoid and correct mistakes

Principle - Robust

- Maximize compatibility with current and future user tools

Aesthetics

- Visual appearance
- Very important
- Simplicity preferred

Can vary with time

iOS: A visual history

In what is widely regarded as his greatest presentation ever, Apple's Steve Jobs introduced the iPhone to the world on January 9th, 2007. In the five-plus years since then, the iPhone, iPad, and iPod Touch have literally redefined the entire world of mobile computing.
